

INFORMATION SHEET SPAMEXPERTS DEDICATED

"Independent, no limits, the cheapest solution to be... simply spamfree!"

SPAMEXPERTS DEDICATED

PRODUCT INFORMATION SHEET

FILTER SPAM AND VIRUSES ON THE HIGHEST POSSIBLE LEVEL

SpamExperts Dedicated is part of the SpamExperts Domain product line. With a dedicated solution, you can filter your clients' email at the highest possible level for spam and viruses, while maintaining complete independence. All email will first be processed by your SpamExperts Dedicated filter SMTP servers. All not spam email will then be delivered to your normal mail exchange SMTP servers. For more information about the many features of our dedicated and hosted solutions, please contact us!

REQUIREMENTS & MODELS

In order to setup SpamExperts Dedicated servers, SSH root access to a new Debian Etch 32bit Linux installation is required. Please use a single partition. We have the ideal solution for businesses of different sizes with varying numbers of domains. All models have no restrictions on the amount of users, inboxes, or traffic filtered.

 - Recommended hardware*:
 - 80 GB hard disk
 - 2 GB RAM
 - Quad core processor

- SpamExperts Dedicated Unlimited:
 - Max. domains filtered: no limit

* Based on average email usage

VIRTUAL SERVERS

It is possible to set up SpamExperts Dedicated servers on Xen, VServer and Virtuozzo virtual servers.

FALLBACK

Having a fallback server is crucial to offer reliable email services. Often fallback servers do not have the same antispam capabilities as primary servers. Spammers are aware of this fact and therefore often target fallback servers to try and deliver their spam messages. To offer a reliable fallback server setup, we fully synchronize your primary and fallback servers for you. This is another security layer to protect you and your clients from spam, always! Note that the normal load of the fallback server in relation to the primary server is much lower (around 1/5).

MANAGEMENT & CONTROL

The settings of the domains and the servers can easily be managed via the SpamExperts API. Also, if necessary, custom adaptations can be made to suit your business' needs. Moreover, we can provide you with detailed manuals on how to activate for instance PDF reporting and the IMAP training system on your dedicated filter server.

UPDATES & MAINTENANCE

SpamExperts will automatically maintain and update your servers. Large maintenance usually takes place Fridays between 1-4am and 8-10am (UTC).

MONITORING

SpamExperts monitors all running services on your SpamExperts Domain Dedicated installation 24x7.
