SPAMEXPERTS DESKTOP

PRODUCT INFORMATION SHEET

FILTER SPAM AND VIRUSES BEFORE IT REACHES YOUR INBOX

With SpamExperts Desktop you can filter the email for your POP3/IMAP accounts on both spam and viruses. All email will be intercepted before it reaches your email client. All not-spam email will next be delivered to the inbox of your email client. All you have to do to activate all filters, is installing the software on your computer and manually classify 10 not spam and 10 spam messages. SpamExperts Desktop will run for free on your computer. The first 30 days you receive all functionality available. After 30 days SpamExperts Desktop will switch to the free SpamExperts Desktop Limited version.

AUTOMATIC SELF-LEARNING SYSTEM

Based on information collected from all SpamExperts Desktop users worldwide this product is always up-to-date with the latest antispam intelligence, feeding its self-learning engines.

- Anti spyware
- Safe Sender Policy
- Sender ID
- Manual whitelist and blacklist

ADVANCED FILTERING TECHNOLOGIES

Best-practice and in-house developed filtering technologies are optimally configured to operate with each other in a unique fashion.

Key technologies employed are:

- Statistical based filtering
- Spam fingerprint detection
- OCR analysis
- Image, PDF
- Combined spam scoring
- Virus scanning
- Anti phishing

EMAIL CLIENT COMPATIBILITY

Thanks to our advanced interception system SpamExperts Desktop works with any email client that is communicating to a POP3 or IMAP server!

SPAM AND VIRUSES NEVER GET IN YOUR EMAIL CLIENT

Both spam and viruses are safely stopped in the SpamExperts Desktop application which operates before your email client. In this manner neither spam nor email viruses will be able to reach your email client.

ALLOWED SENDERS AND BLOCKED SENDERS LIST

In case you receive certain newsletters that may get incorrectly classified by SpamExperts you can easily overrule all filters and add the newsletter address to the Allowed Senders list. In case you like to stop receiving email from someone you can simply add the address to the Blocked Senders list.

SIMPLE SOFTWARE TEACHING

Using drag/drop you can train the software to correctly detect spam. Simply drag/drop the email to the appropriate button and SpamExperts will learn from its mistakes.

FREE EDITION!

SpamExperts Desktop will run for free on your computer. The first 30 days you receive all functionality available. After 30 days SpamExperts Desktop will switch to the SpamExperts Desktop Limited version.

SPAMEXPERTS DESKTOP SCREENSHOT

The screenshot shows the SpamExperts Desktop application window. The title bar reads "SpamExperts Desktop" and the menu bar includes "File", "Edit", and "Help". The main interface features a sidebar on the left with five buttons: "Not Spam" (envelope with green check), "Unsure" (envelope with yellow question mark), "Spam" (envelope with red X), "Blocked Senders" (three people with red X), and "Allowed Senders" (three people with blue check). The main area displays a list of emails with columns for "From", "Subject", and "Date". Below the list, there are fields for "Subject:", "From:", and "To:". At the bottom, there is a "Search for:" field with a question mark icon. Three callout boxes provide instructions: one for the classification buttons, one for the "Blocked Senders" and "Allowed Senders" buttons, and one for the search field.

These are the three list views (Not Spam, Unsure, Spam) under which incoming email is classified. Simply move an email from the list to the correct button if the classification was incorrect.

Help! Click to change your cursor into a help function.

Set strict rules about which emails you do and which emails you do not want to receive in your inbox using the blocked and allowed sender lists.
