FOXXL SOLUTIONS

EMAIL SECURITY IN THE CLOUD OR ON-PREMISES INCOMING » OUTGOING » ARCHIVING

Capitalize on Email Security: Reduce Client Churn Rate & Increase Revenue » Webhost Integration & Automation » Plugins » API » Multi-level Branding

In the recent years, growing regulation surrounding spam alongside the surge of spam and related threats make robust email security systems a necessity for any webhost. Therefore, SpamExperts offers integration, automation and a reseller API to enable fully automated email security by providing plug-ins for all major hosting control panels. Everything is manageable directly for you, your resellers, customers, and end-customers!

Quick Read

FOXXL delivers high quality ASP.NET webhosting and reseller hosting, including support for SQL server databases and MVC support. FOXXL emphasizes on continuity and quality, besides providing top-notch customer support. Moreover, FOXXL distinguishes itself by not being satisfied until the client is completely satisfied with the best-fitting solution for their needs.

Challenges

FOXXL's clients were experiencing spam-related issues, which were cramming up their inboxes. 96% of the world's email traffic is spam and poses massive threats, such as phishing, malware, spyware and viruses. Moreover, FOXXL was not satisfied about their previous solution, which was charging high license costs, and more importantly, it did not offered any automation options.

Customer profile

Company	FOXXL Solutions
Location	Horst, the Netherlands
Industry	Web Hosting, Domain Registration, Online Backup
Number of Domains	5,000
Products in Use	Incoming -and Outgoing Filtering
Website	www.foxxl.nl

Implementation

FOXXL decided to install the SpamExperts' dedicated cluster solution with two nodes, as their servers are currently running inside two virtual machines, spread over two datacenters for redundancy.

Benefits

After the implementation, FOXXL decided to deploy SpamExperts' spam filter for every customer at no extra charge, which in turn was very beneficial for their customers, as SpamExperts **eliminated the hassle of checking whether or not an email was genuine.**

Furthermore, SpamExperts offers **fully automated email security**, which is integrated in FOXXL's hosting backend. SpamExperts has developed **standard integration & automation plug-ins for all major hosting control panels.**

In addition, FOXXL was very positive about SpamExperts' Support team. *"SpamExperts manages the servers and in case of questions, they provide us with good and fast answers."*

Target Reached

"After implementing SpamExperts for our incoming email, all spam issues were being tackled and ultimately disappeared!" according to Paul Hermans, Director of FOXXL Solutions.
