Capitalize on Email Security: Reduce Client Churn Rate & Increase Revenue»WebhostIntegration&Automation»Plugins»API »Multi- level Branding

Handling your spam problems alone costs time, especially when utilizing open source filters, which nearly comprise 100% of the total load on your hosting infrastructure and can lead to mediocre filtering. By deploying SpamExperts centralized, redundant and scalable solutions, you remain in full control of your solutions, as SpamExperts takes care of managing your email security problems, and securing your network!

Quick Read

WANBound is a Managed Service Provider, located in Woerden, the Netherlands, and focuses on delivering their services to their customers based on a fixed fee. It gives customers a quality guarantee and no unpleasant financial surprises. In addition, WANBound offers managed services on firewalls, workstation, servers, Internet (fiber and xDSL), VoIP, webhosting, email security, and hosted exchange. By using its strategic partnerships with industry leaders, such as SpamExperts, Microsoft (Gold Partner), HP (Preferred Partner) and RIPE, WANBound is able to provide trustworthy solutions using their own infrastructure in state-of-the-art datacenters, combined with advanced monitoring.

Challenges

Due to the surge of spam and related threats, WANBound ran into the challenge to keep the mailboxes of their customers safe and clean. The efforts involved with server-based anti-spam/anti-virus solutions were getting out of control. Installing, updating and managing these decentralized solutions proved to be too inefficient and time-consuming. Besides bearing an unnecessary load on their Internet connection and servers, WANBound's previous decentralized solutions performed mediocre, as spam and viruses were still slipping through.

WANBOUND

Customer profile

Company	WANBound B.V.
Location	Woerden, the Netherlands
Industry	Managed Service Provider
Number of Domains	1,000
Products in Use	Incoming and Outgoing Filter + White label
Website	www.wanbound.com

Implementation

Before the deployment of SpamExperts, WANBound had several demands. For starters, the solution had to be off-site from their customers. Moreover, the solution had to be redundant and able to filter hundreds of domains, each receiving thousands of emails per day. Besides redundancy and filtering requirements, the solution had to be easy to deploy and easily managed through an advanced API, enabling programmers to connect it real-time to their systems. Finally, WANBound demanded the best detection -and false-positives ratios available. After researching and testing several solutions, only the SpamExperts solution met all of their demands!

Benefits

According to WANBound, The SpamExperts inbound spam filter **requires little maintenance**, is **easy to deploy**, and is therefore very **cost-effective**. Besides being a **centralized solution**, SpamExperts easily integrated with WANBound's systems through an **advanced API**. Moreover, customers are extremely satisfied, as SpamExperts filtering system filters around 99.98% of all spam, and has a perfect score concerning the spam-ratio -and false-positives-ratio.

Target Reached

"The SpamExperts solution met all of our demands. With the support of the SpamExperts team during our installation and setup, the whole process went smooth and painless", says Wayne Wilson, Financial -and General Director at WANBound B.V.
